*Egentligen en låttext jag skrivit men kände att den gjorde mer nytta här än i något Word-dokument. Ska även tillägga att jag fått göra lite ändringar för att läsningen inte ska bli så enformig.*

### **No fear**

I was sitting down by the sea  
It was freezing  
but the thought of you made me outlast  
the cold

You're too near to feel close, so far away  
my words seems  
I can't say a thing  
But I know that you  
know too  
I really do love you

I just can't put it down in words  
It's not that easy at all  
But I will try my best  
to make you get me  
What will you say when I utter the  
unsaid?

You take me where I need to be  
You lead me through these tunnels of fears  
and not once you've stopped  
to catch your breath  
I can't thank you enough for being my life

Do you know you have saved me  
You are my bodyshaped world  
It's only by you I can breathe  
It's only by you I can live  
Otherwise I guess I'll have to die

When it hurts like the most  
You take my hand and pull me close  
'Cause you know you can heal me  
The way you talk makes me feel safe  
When I hear your voice I am sure

no demons can reach me

I am just another misfit  
Though I have people around me  
they're not you  
They will never be you  
no one could ever be you  
Don't want no future without you  
So would you stay with me  
Please  
Just stay with me

Tonight
