### **Move On (With Me)**

Let's not think of what used to be

Let's move on and look ahead

For what's in front of us

I can forget everything you did

If you just move on with me

And no one else

i can forget everything you said

If you just move on

Move on with me

What is holding you back

Cant you see

It is now or never

don't you stay with me

i am giving you a second chance

I can't wait forever

Even if I wish I could

No, I won't

I can forget everything you did

If you just move on with me

And no one else

i can forget everything you said

If you just move on

Move on with me

What is holding you back

I'll move on with you

Here and now

Don't wait

Follow me..
