

THE HOLOCAUST OF UKRAINE 1932-1933 2022-

The Soviet Union, which is a social ordinance based on terror, slavery, threats and categorization of individuals, also uses famine terrorism as strategic warfare where for example, "Holodomor" 1932-33 in Ukraine is a classic example for its famine, that deliberately would lead to a genocide of about 3 million Ukrainians, repeated the same method in 2022.

As recently as 2010, an investigation was initiated in the court of Kyiv about the Holocaust in Ukraine 1932-33, of which Stalin and his accomplices were found guilty, but all of them were already dead.

Disinformation sources of rumours have repeatedly pointed out Zionism and Stalinism as common conspirators against the Ukrainian people because not a single Jew starved to death under the Holodomor, but who can prove that?

The strategic lies continue but regardless of who is to blame for what has been it is not legal to designate modern Ukrainians as Nazis and drug addicts.

Inherited sin is not always genetically determined, but more political, and being in a situation of austerity between the oppression of the Soviet regime and the threat of Nazism provides only one choice.

The research is still going on
in various process after the
actual scapegoats and
the answer will probably come
after the war in Ukraine 2022.
