

## **mercury and vaccines and goodness**

<center>

"a night with venus, a life with mercury" - 1800s aphorism, relating to the mercury treatment for syphilis. nietzsche took mercury, and actually got wiser from it. when he got blind he wrote whole books in his head, to later be written down by someone else. nothing is as easy as you want it to be. when i took the vaccine i had a rough 6 months, then i had 6 months when i didnt need any neuroleptics or even coffee or tea. no one has replied to my posts about the vaccine doing good, and ive seen no one mention it either. but its out there... same for the conservatives they use on fruits and veggies nowadays, are people so poisoned they cant see the poisons they are putting into the themselves? or the fact that showering makes me smell like a metal lizard - aka the 36 snake poisons in all drinking water. the first apples i bought during the beginning of corona smelled liked brett - formaldehyde! and now theyre trying to put "insect" food as "vegan", since "insects have no emotions", at the same time theres "vegan orange juice", because it doesnt contain insects, and grown in huge warehouse labs?
