*Människan har placerat sig utanför naturen i dumdristig tro att det faktiskt är så det är.*

### **weather talk**

there\'s a place where birds land  
to sit and talk about the weather  
they croak and chirp and chatter  
-about the nice and flyfriendly weather

there\'s a place where flowers grow  
to sway in the wind and talk about the weather  
they vibe and telepath and feromone  
-about the lifegiving rainbringing weather

there\'s a place where animals pace  
to lie around and talk about the weather  
they growl and whine and sniffle  
about the scentbearing sunwarming weather

and finally

there\'s a place where humans go  
to sit and talk about the weather  
they whine and groan and scorn  
~~-about the neverreallyright weather~~
