The unseen time is any time or moment shared by only two people. You can never explain what you see in your partner to anyone else in this time because they will never experience it. One such moment is is the time immediately after making love.

The princess who was beautiful when she wasn't looking

In the unseen time

that inbetween time

when movement becomes unnecessary,

superfluous.

She blooms.

Her skin with the sheen of silk

and smooth like milk,

is soft and taut.

She smells warm

like summer rain.

(title borrowed from Bellman and True.)
