FRAIL... (Patrique)

Frail...

like a lonesome harpsichord

in a cracked winter's

sadness bound...

like in a frozen moment

when all icecrystals in space

meets the ground...

like a wind blowing lost

entangled in the limetrees

bare branches...

Frail...

and scared to fall apart...

to become moondust

in a solitary echo

a thousand lightyears

away...

afraid the bittersweet

touch called

love...

will extinguish

the light before

long...

(Patrique 11/12/08)
