Visit My Haze

Join the other realm
where time is standing still
in a liquid motion of great proportion
A place for us to chill

Come join the other realm
and surf within the mist
A crystal treasure for rapid pleasure
where only we exist

In another sphere
far from here
we take the maze to the haze

Join the other realm
another bright of joy to feel
In another sector you change the spectre
and you appeal the surreal

Come join the other realm
float around in the big blue sky
Here you'll find every one kind
as we are mellow and high

In another sphere
far from here
we take the maze to the haze
Where our pain won't come back again
and the suffering of thoughts has been replaced
