**a circle never ends**

If you walk round and round  
in a circle all day  
it won't heal your wound  
it makes your world gray

you get blisters on your heel  
and your world will spin  
round round round  
no walk can make you feel  
pain  
like fallin' to the ground  
again and again and again

it makes you dizzy  
and once you're finally still  
the world keeps spinning  
it makes you feel ill  
and you wish to be running  
far far away

And if you do start leaping  
remember you're not here to stay  
you'll only end up creeping  
because a circle is the wrong way  
and you know my friend,  
a circle has no end.

and it goes  
round round round
