Empty

It's feeling quite empty

Nothing feels

Im just neutral

No happiness

No joy

Just empty

The feeling is hollow

Hollow like a black hole

The space seems so endless

Why are we where?

Is there a god?

Is there someone out there?

I think were all alone inside

Noone is watching us from above

It's just us, and no one eles.

We're here for no reason

just living, breathing and dying

Maybe there's something more then just that

But I think not

It's just us.
