(what is it, a peaceful place?)

Art of Life

Politics, economy, biology

physics

or

culture, ethics and psychology

where we shall seek a well of knowledge?

We are building our "art of life"

of the past…

Is there any collective memory around us?

Do you have desire of dreaming

your own dreams

or they consist only of other’s shattered thoughts?

Maybe you should

shut down TV sets

and learn a new communication

heart to heart – talk to me

not phone to phone

a new concept?

in a different way.

O… all this technology….

Maybe only in dreams

you can hear angels, whispering?

Maybe in your eyes only

I can see your soul….
